

Case Study

Improving Inventory Management: The Shaw Group

Shaw Group Ltd. Head Office

The Company: The Shaw Group

The Shaw Group is a leading natural resource manufacturer and community developer, located in Eastern Canada, focusing heavily on construction industry products. Competing in a variety of market sectors The Shaw Group welcomes innovative opportunities that will give them the leading edge among competitors.

The Challenge

As a progressive company, The Shaw Group welcomes new business ideas. Shaw came to Source Atlantic looking for a technology Solution that would reduce suppliers, improve their inventory re-order accuracy while keeping the bulk of their inventory management with their storeroom attendant. Shaw was tracking inventory manually using spreadsheets and, in many cases, replenishing inventory by visually identifying low or depleted stock levels. This process became lengthy and cumbersome as the amount of SKUs increased.

“The implementation of this Mobile App was seamless due to its ease of use.”
 – Gerry Ashley,
 The Shaw Group
 Purchasing Agent

The Solution

Source Atlantic introduced The Shaw Group to the Source Atlantic iPhone App, an order entry tool that eliminates the need to manually re-order inventory. The App only requires a few steps to enter the purchase order:

1. A Shaw employee logs in to the App with their Ship-To ID #
2. Scan the Source Atlantic barcode with the iPhone camera
3. Enter the re-order quantity
4. Confirm the purchase order to Source Atlantic

A confirmation email is then sent to confirm the ordered items.

The Result

The Source Atlantic iPhone App immediately helped The Shaw Group's employees reduce the time spent manually recording, transferring and emailing purchase orders as well as re-working manual entry errors. The Shaw Group reduced the value of their on-hand inventory and optimized delivery time by using the Source Atlantic iPhone App to automatically transmit orders to the nearby Source Atlantic branch.

The Source Atlantic iPhone App has improved the efficiency and accuracy of The Shaw Group's ordering processes. As a result of this success, Shaw plans to use the technology in other process site locations across their company.

Could your company capitalize on a more efficient inventory management system with an easy-to-use iPhone re-order system? Contact your Account Manager today to discuss or arrange a consultation with our Solutions Team.

“The Source Atlantic App has provided us with an efficient and accurate ordering process that can be completed in less than five minutes.”

Supply Chain Management Solutions

Supply Chain Mapping

Source Atlantic's extensive knowledge and experience, across many different industries, positions us as experts in supply chain analysis. Our solutions team will work with you to understand the current state of your business, identify the opportunities for improvement and design a future state. From there we can help implement changes, monitor the improvements and make any necessary adjustments.

E-Vending

Source Atlantic's automated inventory control solution uses a state-of-the-art, robust inventory control system designed to help optimize your company's processes, minimize waste, and realize savings opportunities.

Vendor Managed Inventory (VMI)

Our Vendor Managed Inventory Program (VMI) will help you manage your low-value, high-turning stock items by having a Source Atlantic representative go to your business and replenish your stock. Through a continuous improvement strategy we will reduce: receiving, stocking, stock-outs, carrying costs and procurement costs.

Mobile Store

The Source Atlantic Mobile Store brings a fully stocked, customized container right to your job site. This solution has been designed to reduce operating costs and minimize down time waiting for deliveries and off-site pick-ups.

Source Card

The Source Card offers you a faster alternative for purchasing goods and services. With pre-approved transaction and credit levels, simply place your order. Multiple buyers making frequent transactions can apply a job reference number at purchase. Each month your company will receive a statement showing, by cardholder, their transactions and respective job reference numbers.

Mobile App

The Source Atlantic iPhone App is an order entry tool that will help to improve your business' Inventory Management and eliminate the need for manual order entry. The iPhone App uses the 1) phone's camera, 2) or accompanying Bluetooth scanner to scan an item's barcode and send the order directly to Source Atlantic. The app is a simple, cost-effective way to auto-generate replenishment purchase orders to Source Atlantic.
