Powerful Solutions. Global Force.

ENERPAC 

Integrated Solutions

Enerpac's Integrated Solutions division provides high force system solutions to meet customer requirements for safe, precise control of movement and positioning. With more than 50 years of experience, Enerpac has gained unique expertise in delivering hydraulic solutions for the controlled movement and positioning of structures.

**An Authorized
 ENERPAC 
 Repair Center**

Hydraulic Gantries

Heavy lifting systems that offer control and stability, even in confined spaces.

Strand Jacks

Strand jack systems that provide fully controlled precise lifting.

Skidding System

A system comprised of a series of skid-shoes powered by hydraulic push-pull cylinders, traveling over a pre-constructed track.

Self-Propelled Modular Unit (SPMU)

A trailer with a slim design to transport large and heavy objects.

Synchronous Lifting System

High pressure hydraulics combined with computer-controlled monitoring systems for precise lifting applications.
