Rigging Inspections and Recertification Capabilities

Do you know how often lifting and rigging products need to be inspected?

Does your team know how to inspect them?

Rigging inspections are critical to the safety and compliance of your job site. Source Atlantic's inspection program helps our customers stay on top of mandatory inspection requirements.

WE PERFORM INSPECTIONS, REPAIRS & RECERTIFICATION'S ON:

- Wire Rope Slings
- Synthetic Slings
- Slingmax® Round Slings
- Chain falls
- Hardware

OUR RIGGING SERVICES INCLUDE:

- Inspection
- Certifications
- Testing
- Repair
- Manufacturing
- Replacement
- Warehousing
- Ordering
- Notification alerts

Inspection Program

The Source Atlantic team works with you to proactively schedule regular inspections and help you audit your rigging products. We document and track the inspection requirements for each piece of rigging in your inventory. Our team can provide you with the convenience of on-site inspections to minimize downtime.

Repairs & Recertification

For quality lifting and rigging products that require repair, Source Atlantic is here to help. Our repair technicians are trained to the highest standards and are qualified to repair synthetic, wire rope and chain slings as well as most makes of hoisting equipment and hoisting equipment and associated components.

RFID Asset Tracking & Management

Whether you sign up for our inspection program or are just interested in tagging your inventory and other assets, we have RFID chips and tags to fit a wide variety of equipment. RFID chips can make tracking your inventory easier and efficient. With RFID you can instantly identify your asset and its compliance status, view inspection notes and details, search through all your tagged assets easily, and so much more!

Warehousing & Ordering

You have made significant investments in your rigging equipment and other key assets. Source Atlantic can accurately and efficiently manage these products for you so they are compliant and in safe working condition at precisely the time you need them to be.

Source Atlantic will manage your rigging equipment either at your facility, at a job site or at a local Source Atlantic branch. You can retain visibility to your items through various software programs and technology platforms including a mobile app, online catalogue, or point-of-use inventory management software.

Because each customer is unique in their own business model and market, we customize asset management solutions to suit the circumstance. Allow the Source Atlantic team to manage your rigging products and ensure you have the gear to get the job done safely and on time-- every time. We can provide up to date certifications, repair or replace items as you feel necessary to meet your equipment needs.
